

A large, stylized magnifying glass graphic. The handle is a thick blue line extending from the bottom left towards the center. The lens is a large yellow circle with a thick blue border. Inside the yellow circle, the text "DATA SHEET" and "ES-17-XQ024-0600-XXXX" is written in blue.

## **DATA SHEET**

**ES-17-XQ024-0600-XXXX**

## **CONTENTS**

1. Introduction
2. Feature & Application
3. Mechanical Dimensions
4. Electro Optical Parameters
5. Limit Parameters
6. Chromaticity Coordinate
7. Characteristic Curves
8. Packaging Specification

# ES-17-XQ024-0600-XXXXX Datasheet

Our product has excellent reliability & high quality. Everstar COB series covers a wide range of luminous flux.

The element arrangement in LED package is capable of utilizing light more effectively with higher performance.

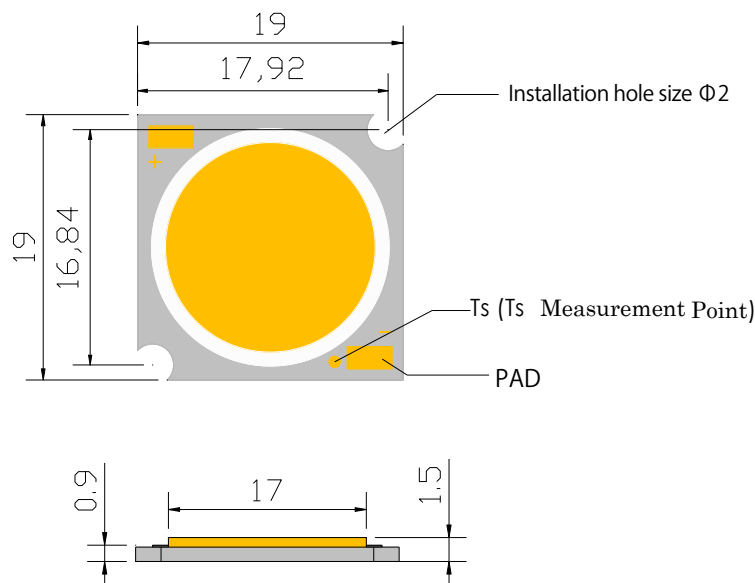

## FEATURES

- High color quality, high flux, high efficacy
- Low thermal resistance
- Long lifetime
- Easy to assemble
- RoHS compliant
- Available in white chromaticity bins form ANSI

## APPLICATIONS

- LED bulb lights
- LED spot lights
- LED recessed lights
- LED miner lights
- Commercial lighting
- Domestic lighting
- Museum lighting

Mechanical Dimensions

All dimensions are in millimeters (mm), tolerances are ±0.25 mm.

Electro Optical Parameters

Parameters	Conditions	Min	Typ	Max	Unit
Forward V	IF=600mA	34	36	40	V
Forward A		420	600	1050	mA
Luminous Flux IF=600mA	TC=2700K	2200	2430	2690	LM
	TC=3000K	2680	2850	3020	
	TC=4000K	2820	3000	3180	
	TC=5000K	-	-	-	
	TC=2700K	-	-	-	
	TC=6000K	2700	2870	3050	
	TC=6500K	-	-	-	
Power	IF=600mA	-	21	34	W
Ra		80	-	-	

Note:

- 1) device tolerance for luminous flux:±4%
- 2) device tolerance for color coordinate:±0. 002
- 3) device tolerance for forward voltage:±0.1V
- 4) device tolerance for angle :±5 degrees

## Absolute Maximum Ratings

Item	Symbol	Min	Max	Unit
Operating Temperature	$T_{opr}$	-10	+85	°C
Storage Temperature	$T_{stg}$	-40	+100	°C
Soldering Temperature	$T_{sol}$	/	350	°C
Junction temperature	$T_j$	/	125	°C
Thermal Resistance	$R_{j-c}$	/	2.24	°C/W
Antistatic Ability	ESD	2000		V

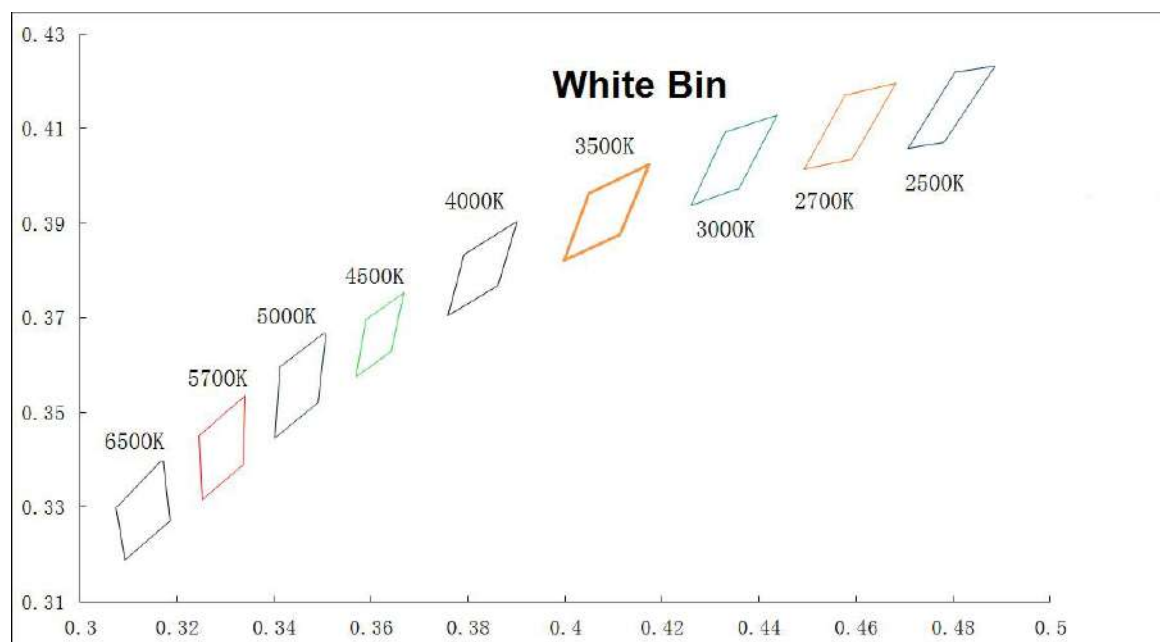

Note:

The temperature of Aluminum PCB do not exceed 85°C.

When hand soldering, keep the temperature of iron below 350°C and for less than 5 seconds

## Chromaticity Coordinate Groups

White bins on CIE -1931 ( $T_a=25^\circ\text{C}$ )

Color Temperature and BIN

Characteristic Curves

Forward Current / Radiation/ Temperature Characteristics

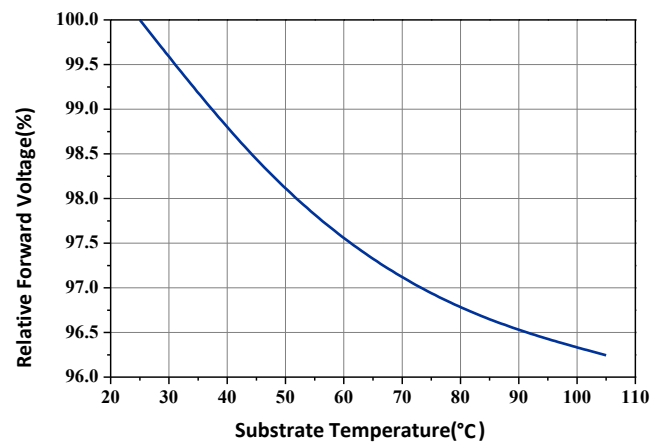

Luminous flux efficiency vs operating power (blue line)  
Relative Luminous Flux vs Operating power (yellow line)

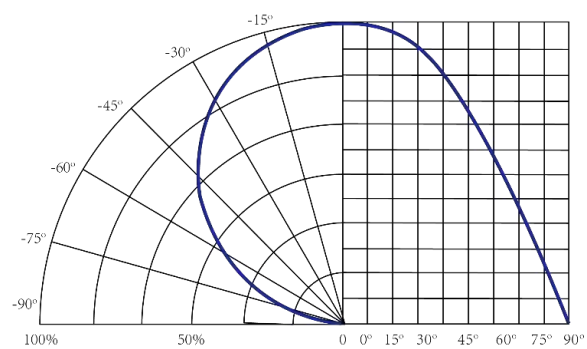

## Relative Luminous Intensity vs Substrate Temperature

 $I_f = 600\text{mA}$ 

## Forward Voltage vs Substrate Temperature

 $I_f = 600\text{mA}$ 

## Radiation Angle

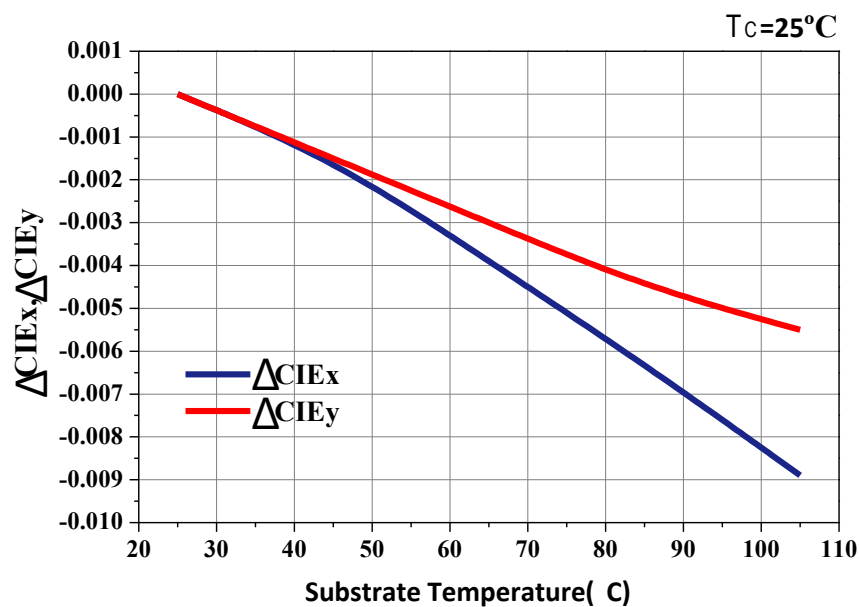

## Color Shift Characteristics

$\Delta$  CIE x,  $\Delta$  CIE y vs Forward Current  
CRI(Ra)=80 Tc =25°C If= 600mA

$\Delta$  CIE x,  $\Delta$  CIE y vs Substrate Temperature  
CRI(Ra)=80 Tc =25°C If= 600mA

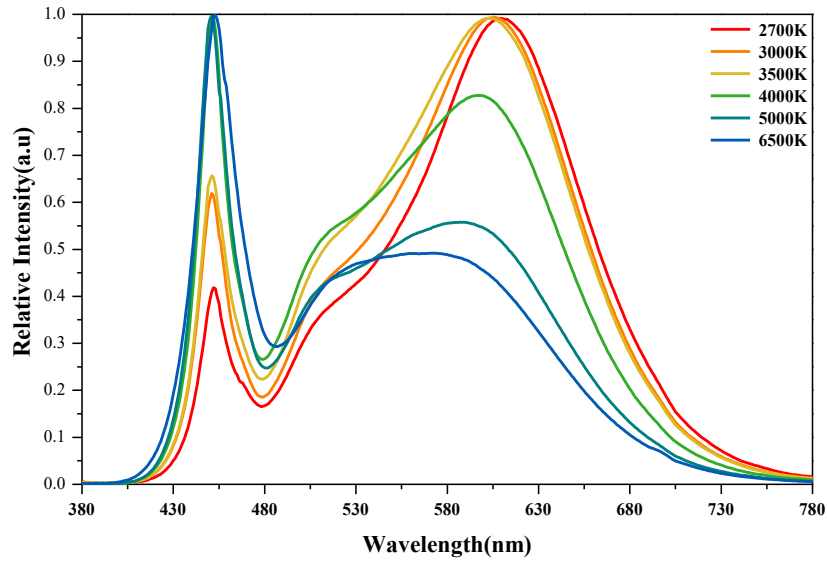

## Spectrum Distribution

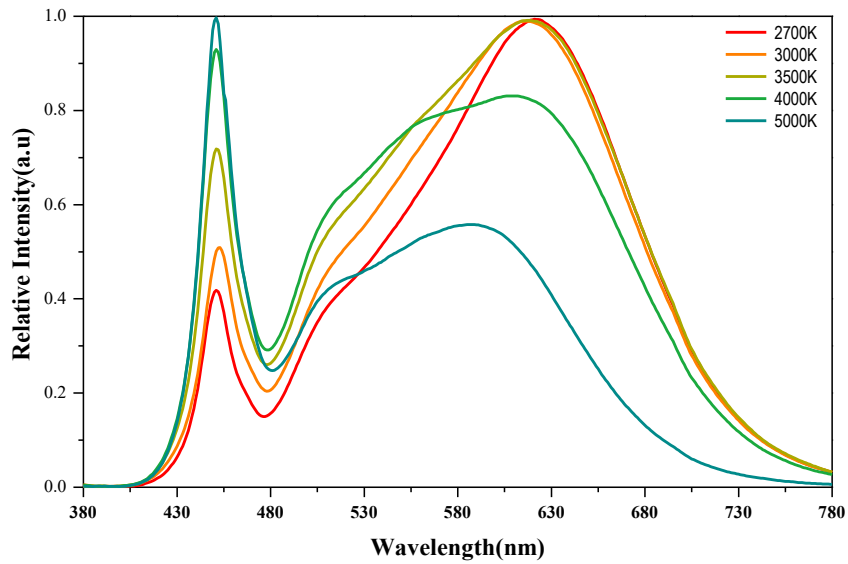

### Relative Intensity vs Wavelength

If=600mA

#### CRI(Ra) 80Min

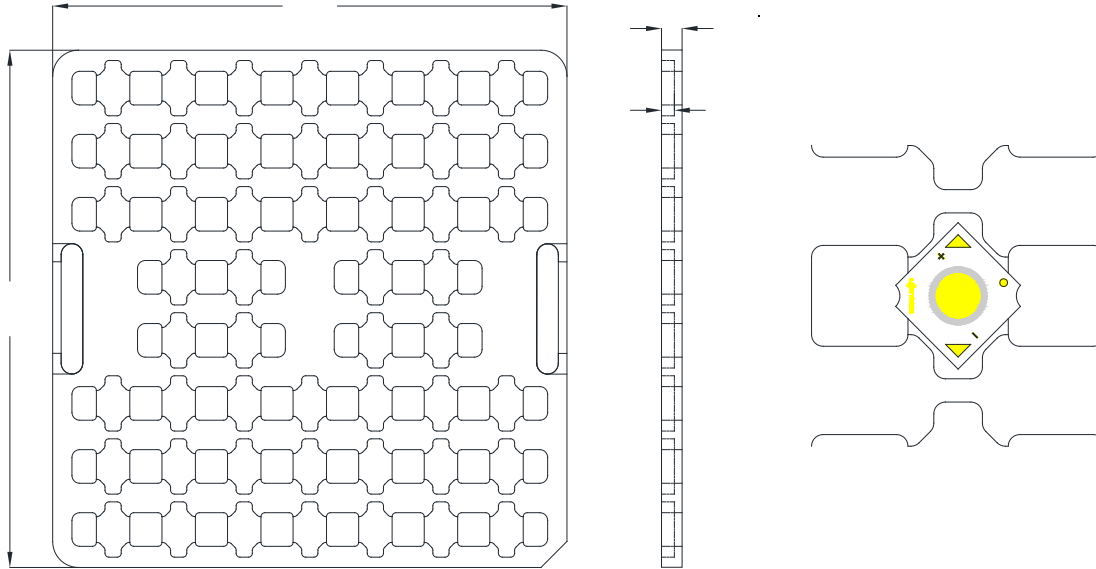

#### CRI(Ra) 90Min

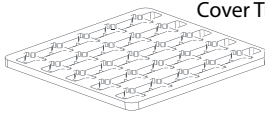

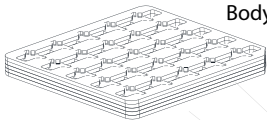

## Manner of packing

Cover Tray(1sets)

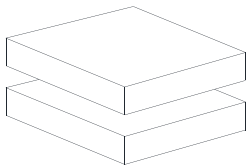

Body Tray(5 sets)

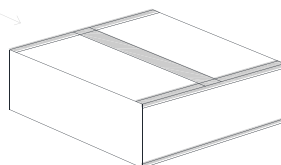

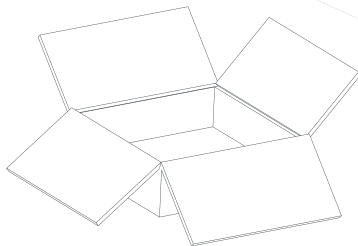

5 body Tray / MBB bag  
(MBB-BAG : Heat Sealing)

MBB bag  
Heat Sealing

4,8 or 16 bags / box

1)  
An empty tray is placed on top of a  
5-tier tray which contain 50 PCS each.  
(Smallest packing unit:250 PCS)

2)  
A label with product name, quantity  
and lot number is placed on the upper  
empty tray. (Tray Dimension:200\*200\*8 mm )

## Cautions

---

### Storage

Store the parts in a dry, nitrogen- purged cabinet or container that actively maintains the temperature at 20 - 30 and the RH at no greater than 60%.

### Precautions for Use

By using anti - static - electricity bracelets/ cushions/ overalls/ shoes/gloves and anti - static - electricity containers, it can effectively prevent static electricity and surge. The soldering iron point should be properly grounded. When hand soldering, keep the temperature of iron below less 350°C and less than 5 seconds

### ESD Protection

You need to take the protective measures for the product being sensitive to static electricity. It can lead to product damage electricity is beyond the maximum rating. The ground resistance if the high voltage current made by static can't beyond 10  $\Omega$ .

### Cleaning

Please do not make the thermal grease, oil exposed to the light - emitting surface. Airgun can be used to remove dirt. Gun's Pressure: 0.5MPa, Time: 1 to 2 seconds, Distance: more than 20cm.

### Overcurrent Protection

It is recommended to design PCB with ground circuit. Pay special attention to the operating environment of the products. Humidity must be between 50% and 80%, or else electrostatic breakdown and overcurrent damage would occur. The operating temperature is -10°C ~ 85°C. When using this product, please observe the absolute maximum ratings and the instructions for operating outlined in these data sheets. Company do not assume any responsibility for any damage, resulting from use of product which does not comply with the absolute maximum rating.
